...with a *Solar Ner Tamid!*

A tremendous opportunity exists for a Men's Club to construct and celebrate a symbol that demonstrates both the importance of energy renewal and the role the Jewish community can play in using energy wisely.

It is our contention that meaningful programming focusing on energy renewal will attract and involve our existing membership as well as the unaffiliated and the younger generations.

Every synagogue has an Eternal Light, a Ner Tamid, in its sanctuary and chapel. It is time to convert the symbol of G-d's eternal presence into something that is truly eternal, a solar Ner Tamid.

Our specially designed solar Ner Tamid will enhance your synagogue, your community, and, ultimately, the planet.

- Uniquely designed for reliable Ner Tamid operation
- Can be used in portable or fixed installations
- Easy installation with no facility wiring required
- Reduce synagogue, congregant, and community energy usage
- Enhance the image of our synagogues in the Jewish and secular communities
- Build stronger ties with the non-Jewish community
- Attract and involve men in the Men's Club

Contact MacroEnergy® at sales@solarcombo.com to order your solar Ner Tamid today.
